DURA-SONIC provides superior noise abatement, ease of use, and flame-resistant options

DURA-SONIC is widely used to control noise in:

- Industrial and Construction Equipment
- Vehicle and Cab Interiors
- Workspaces – Manufacturing and Plant Offices
- Aerospace – Noise Control with High Temperature Flame Resistance

DURA-SONIC is a growing series of sound barriers designed for efficient sound attenuation, ease of fabrication and installation. The heart of the structure is a flexible polymer barrier offered in a variety of construction weights, widths and options, including: with or without sound absorbers such as foams, non-woven materials and reinforcements. Available with both smooth and embossed face surfaces.

DURA-SONIC is engineered to meet all specifications for end-use performance ... appearance ... fabrication and installation.  
(See back side for more details.)
From simple to complex constructions, DURA-SONIC can be designed to serve a wide variety of applications

DURA-SONIC can be engineered as a Barrier Curtain or Partition ... a Composite Barrier/Absorption material ... or a Vibration Damping product. It also offers high temperature flame resistance (meeting Federal Aviation Flame Requirement FAR 25.856).

Wherever acoustics are important – think DURA-SONIC

Cost-Effective Noise Control
DURA-SONIC applied directly to industrial equipment

Typical Applications:
- Compressors • Fans
- Generators • Motors
- Conveyors • Gear Boxes
- Pumps, Pipes & Ducts
- Enclosures or Cabinets

Vehicle & Cab Interiors
Engineered for Heavy-duty Vehicles, Marine, Motor homes, Passenger Rail Cars, etc.

Typical Applications:
- Cab firewalls
- Side & back panels
- Dashboard insulation
- Roof insulation

Noise Control for Office Spaces
DURA-SONIC versatility delivers optimum sound barriers in Ceilings, Walls and Door Cavities

Typical Applications:
- Above drop ceilings in office or meeting areas
- In door and wall cavities
- Raised Flooring

High Noise Area Curtain-Walls in Manufacturing
Reinforced materials fabricated into a Curtain or Partition

Typical Applications:
- Manufacturing • Shipping
- Clerical • Meeting Areas

Aerospace DURA-SONIC
Mass-loaded, reinforced sound barrier specially formulated for acoustic applications and flame resistance, with enhanced flexibility, meeting FAR 25.856. Many materials offer REACH compliance.

Typical Applications:
- Fire-barrier blankets
- Acoustical blankets

Dream it. And we’ll develop it.
Bring us your needs and goals ... and we’ll design a DURA-SONIC that meets all your specifications.
